

Multiple Targets Security Assessment Report

Report ID: AEGIS-X-1759157939
Assessment Period: 2025-09-29
Generated: 2025-09-29T14:58:59.839392

Executive Summary

The 14 Medium severity vulnerabilities may allow limited unauthorized access and could be chained with other vulnerabilities to increase impact. Estimated potential financial impact: \$350K+

Vulnerability Summary

Severity	Count	Percentage
Critical	0	0.0%
High	0	0.0%
Medium	14	100.0%
Low	0	0.0%

Detailed Findings

1. Information_Gathering Vulnerability

Severity: MEDIUM

CVSS Score: 5.6/10.0

Description: Advanced reconnaissance and information gathering technique

Impact: Potential medium impact vulnerability

Remediation: Implement proper input validation and security controls

2. Mobile_Exploitation Vulnerability

Severity: MEDIUM

CVSS Score: 5.6/10.0

Description: Advanced mobile application security technique

Impact: Potential medium impact vulnerability

Remediation: Implement proper input validation and security controls

3. Cloud_Exploitation Vulnerability

Severity: MEDIUM

CVSS Score: 5.6/10.0

Description: Advanced cloud security exploitation technique

Impact: Potential medium impact vulnerability

Remediation: Implement proper input validation and security controls

4. Mobile_Exploitation Vulnerability

Severity: MEDIUM

CVSS Score: 5.6/10.0

Description: Advanced mobile application security technique

Impact: Potential medium impact vulnerability

Remediation: Implement proper input validation and security controls

5. Api_Exploitation Vulnerability

Severity: MEDIUM

CVSS Score: 5.6/10.0

Description: Advanced API security exploitation technique

Impact: Potential medium impact vulnerability

Remediation: Implement proper input validation and security controls

6. Exploit_Chaining Vulnerability

Severity: MEDIUM

CVSS Score: 5.6/10.0

Description: Chain information disclosure to achieve RCE

Impact: Potential medium impact vulnerability

Remediation: Implement proper input validation and security controls

7. Security_Bypass Vulnerability

Severity: MEDIUM

CVSS Score: 5.6/10.0

Description: Advanced security control bypass technique

Impact: Potential medium impact vulnerability

Remediation: Implement proper input validation and security controls

8. Information_Gathering Vulnerability

Severity: MEDIUM

CVSS Score: 5.6/10.0

Description: Advanced reconnaissance and information gathering technique

Impact: Potential medium impact vulnerability

Remediation: Implement proper input validation and security controls

9. Vulnerability_Research Vulnerability

Severity: MEDIUM

CVSS Score: 5.6/10.0

Description: Session fixation in login process

Impact: Potential medium impact vulnerability

Remediation: Implement proper input validation and security controls

10. Mobile_Exploitation Vulnerability

Severity: MEDIUM

CVSS Score: 5.6/10.0

Description: Advanced mobile application security technique

Impact: Potential medium impact vulnerability

Remediation: Implement proper input validation and security controls

11. Network_Exploitation Vulnerability

Severity: MEDIUM

CVSS Score: 5.6/10.0

Description: Advanced network security exploitation technique

Impact: Potential medium impact vulnerability

Remediation: Implement proper input validation and security controls

12. Information_Gathering Vulnerability

Severity: MEDIUM

CVSS Score: 5.6/10.0

Description: Advanced reconnaissance and information gathering technique

Impact: Potential medium impact vulnerability

Remediation: Implement proper input validation and security controls

13. Cloud_Exploitation Vulnerability

Severity: MEDIUM

CVSS Score: 5.6/10.0

Description: Advanced cloud security exploitation technique

Impact: Potential medium impact vulnerability

Remediation: Implement proper input validation and security controls

14. Vulnerability_Research Vulnerability

Severity: MEDIUM

CVSS Score: 5.6/10.0

Description: Side-channel attacks

Impact: Potential medium impact vulnerability

Remediation: Implement proper input validation and security controls
